

Proud partner of the brewery and cider industry for over 30 years

Constant America has a wide variety of products specially designed for cleaning and sanitation in the brewery and cider industry.

- **CENTRACID III** is a highly concentrated mixture of nitric and phosphoric acid. This non-foaming product removes all traces of scale and mineral deposits.
- **ALCOTECH** is a powerful sanitizer designed for the cleaning of surfaces that are at high-risk for contamination. No rinsing necessary, it evaporates rapidly, sanitizing surfaces where the use of water is not suitable.
- **CIP ALK** is a non-foaming alkaline detergent formulated to "clean in place" (C.I.P) for tanks, line circuits, etc.
- **OXISAN** is a balanced mixture of 2 active ingredients: peracetic acid and hydrogen peroxide. Oxisan was formulated to sanitize surfaces in contact with food and is ideal for C.I.P.

With us you're always a winner!

- Highly experienced industry professionals
- Turnkey and free on-call service
- Reliable after-sales service
- Installation and dosing equipment supplied
- Our products are **fragrance-free**
- Certain products require **no rinsing after use**; therefore less risk of contamination with city water
- Our products are manufactured in-house following ISO standards and are Kosher certified
- Our products are CFIA approved
